

Kartik Sharma

SDET/QA

PROFESSIONAL SUMMARY

A dynamic and detail-oriented SDET with expertise in automation and manual testing, featuring proficiency in Selenium, TestNG, and Postman. Adept at using Generative AI and swiftly learning new technologies. Strong problem-solving and collaborative skills, with a passion for algorithmic precision.

PROJECTS

1. Coursera Web Testing |

Cypress | Manual Testing | Cucumber | JavaScript

- Designed and executed test scenarios to identify issues in the Coursera website, focusing on usability and functionality errors.
- Documented and reported identified issues with clear reproduction steps, enhancing communication with developers.
- Developed and organized manual and automated test cases using Cypress and Cucumber for comprehensive testing coverage.
- Actively worked with developers to ensure timely resolution of identified bugs and improvements.

2. Clinic Cases Website Testing(Manual Testing) |

- Designed and executed comprehensive manual test scenarios to identify issues in the clinic management website.
- Reported identified issues such as registration errors and UI inconsistencies, providing clear steps for reproduction.
- Developed detailed test plans and test cases focusing on user interface and functionality validation.
- Worked closely with developers to ensure timely resolution of bugs, improving overall user experience.
